

ENVIRONMENTAL POLICY

Leading Electrical Group is a business that specialises in a range of services within the tertiary, government, and education sectors. Whether it is planned or reactive maintenance, we are the reliable and experienced choice. With a fast response time and a professional manner, we will solve the core of the problem the first time. We will keep you fully informed throughout the job through to completion. Utilising our job management system, you will have instant feedback on all your reported maintenance requests.

Leading Electrical Group offers a full after hours, emergency call-out and make safe service. Whether it is a power outage as a result of a storm, a roof leak that is impacting a switchboard, a damaged and critical light fitting or an electrical fire, we provide an emergency response service to suit.

Leading Electrical Group recognises the importance of protecting the environment for the benefit of our employees, contractors, apprentices, visitors and our wider community which may be impacted by Leading Electrical Group products and services. Our commitment is to deliver our services / projects in an environmentally responsible manner with due consideration to the principles of Ecological Sustainable Development (ESD) with little to no impact to the environment.

Leading Electrical Group is committed to:

- complying with all relevant environmental legislation, regulations, codes of practice, standards and contractual requirements
- preventing pollution of the environment from activities over which we have control
- protecting the environment by monitoring the activities under Leading Electrical Group control
- conducting business with suppliers and subcontractors who also have a commitment to responsible environmental management
- addressing, as a priority, threats of serious or irreversible environment damage
- conserving biological diversity and ecological integrity
- providing training and education to employees and contractors
- continually improvement of Leading Electrical Group environmental management performance by regular reviews and setting realistic environmental objectives and targets.

All workers are authorised and expected to safely stop work and immediately notify their supervisor if a task carries an unacceptable level of risk.

Compliance with this Environmental Policy is mandatory for all employees, contractors, apprentices, visitors and other persons potentially impacted by Leading Electrical Group. Through ongoing instruction and training, employees, contractors, apprentices, visitors and other persons potentially impacted by Leading Electrical Group will be capable of meeting the objectives of this Policy.

Leading Electrical Group is committed to:

- conducting regular environmental inspections and audits of our operations to ensure waste and pollution are prevented or minimized and energy efficiency is maximized
- maintaining a commitment to continually improve environmental management via our business activities to actively reduce our carbon footprint
- maintaining a framework for reviewing environmental objectives and targets through analyzing the environmental risks at each new site

LEADING ELECTRICAL

ENVIRONMENTAL POLICY

- cooperating with appropriate authorities and ensuring all licenses, approvals and permits are current
- developing and implementing emergency plans in order to minimize any adverse environmental impact.
- through employee awareness programs and stakeholder engagement promoting the protection and enhancement of biodiversity and ecosystems

To achieve our policy goals, we will plan and manage our activities in accordance with best practice environmental management principals. This includes achieving an equitable balance between environmental, social and economic considerations.

Management fully endorses this Environmental Policy.
